IMPLANT DENTISTRY: PROSTHETICS OR SURGERY?

Implant dentistry, to become simple, repeatable and predictable, adequate planning is essential. The prosthetic plan dictates the procedures, sequence and techniques for an effective outcome. The presentation elaborates these different attributes for a predictable success.

Varun Acharya

PRACTICAL RECOMMENDATIONS TO MINIMISE RISK FACTORS AND COMPLICATIONS ASSOCIATED WITH DENTAL IMPLANTS

Although practitioners enjoy a high rate of success restoring patients with endosseous implants, all of us have or will encounter dental implant failures, either surgical, prosthetic, or both, during our career. This evidence based lecture aims to educate the listener on recommendations to minimize the technical and biological risk factors associated with the placement and restoration of dental implants and also aims to provide practical solutions to deal with implant complications, as and when they arise.

IMPRESSION TECHNIQUE HANDS-ON

Transferring the Implant positions from the mouth to the working model is critical to the success of Implant Restorations. The hands-on will help you understand how to ensure precision in Implant impression making as well as how to verify the accuracy.

We encourage you to bring in your cases for discussion with the course mentors!

COURSE SCHEDULE

Sunday, March 5, 2017

Registration:	09:30 am - 10:00 am	Lunch:	01:00 pm - 02:00 pm
Paresh Kale:	10:00 am - 11:30 am	Paresh Kale:	02:00 pm - 03:00 pm
